Introduction to AWS

What is AWS?

- AWS stands for Amazon Web Services.
- Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted Cloud Platform.

What is AWS?

- AWS offers over 200 fully featured services
- Millions of customers are using AWS to lower costs, become more agile, and innovate faster.

Introduction to AWS

History of AWS

AWS launched its first service in 2004. Over the years, many new services were put into service. But in this diagram, the real breaking point started in 2006, when AWS allowed developer begin to access to Amazon's own back-end technology and own infrastructure.

2000 came into picture

2004 The first Service SQS was launched.

2006 AWS Launches S3, and EC2-Access allow

2007 Simple DB

2008 Elastic IPs, EBS, Cloud Front,

2009 VPC, RDS, Route 53

Cloud Formation 2010

DynamoDB, Glacier, Redshift 2012

CloudTrail, Kinesis, Lambda 2013

Aurora 2014

EC2 Container Service 2016

Elastic Kubernetes Service 2018

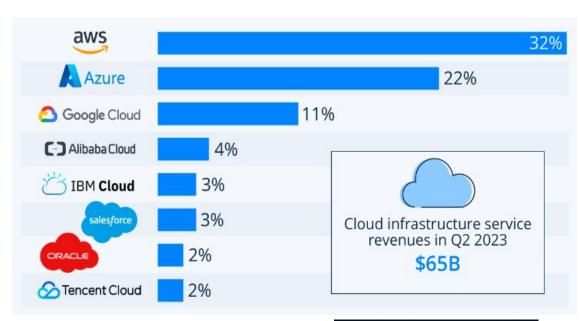

Introduction to AWS

AWS Market Share

AWS 32%
Azure 22%,
Google Cloud 11%,
Alibaba Cloud 4%
IBM 3%
Others 28%.

AWS Pros

- AWS offers more than 5 times the computation capacity in use compared to the aggregate of the other 14 leading market providers.
- With hundreds of thousands of customers operating every possible use case on AWS in over 190 countries.
- Thousands of independent software vendors such as SAP, Oracle, Adobe, Microsoft, etc.
- Amazon Web Services currently supports over 2,000 government agencies and 5000 educational institutions.

Introduction to AWS

AWS Cons

- Sometimes a difficult learning curve for large companies
- Billing can be confusing
- Amazon's FC2 Limits
- **Common Cloud Computing** problems

AWS Infrastructure

AWS Infrastructure Introduction

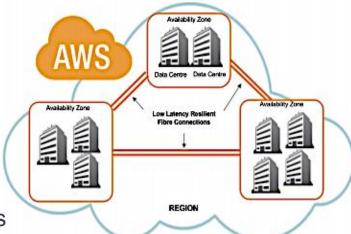

Region 32

Availability 102
Zones

Data Centers

AWS Infrastructure Introduction

- AWS Regions and Availability Zones
- Multiple Availability Zones in AWS Region*
- Availability Zones consist of one or more discrete Data Centers

* Asia Pacific(Osaka) Local Region have only one Availability Zone.

AWS Regions

31 Geographic Regions

N. Virginia, Ireland and Singapore are the regions with the most service-support in their continents. In the other regions, not all services of AWS are in progress

Current Regions

New Regions coming soon (Canada, Israel, Malaysia, New Zealand, and Thailand.)

AWS Infrastructure

Factors Impacting Region Selection

Governance and **Legal Requirements** Latency

Cost

Service availability

AWS Availability Zones

AWS Infrastructure

AWS Availability Zones

- An Availability Zone is a facility where the data centers are located.
- There are currently 102 Availability Zones
- All AZ's in an AWS region are interconnected with metro fiber.
- All traffic between AZ's is encrypted.
- AZ's are physically separated by a meaningful distance, many kilometers, from any other az, although all are within 100 km (60 miles of each other).

AWS Data Centers

- The data center infrastructur e consists of physical or hardware-based tools and components.
- Data centers are where our information is stored.
- AWS data centers are secure by design.

Northern Virginia Data Center

AWS Infrastructure

AWS Data Centers Layers

Infrastructure Layer

Data Layer

Perimeter Layer

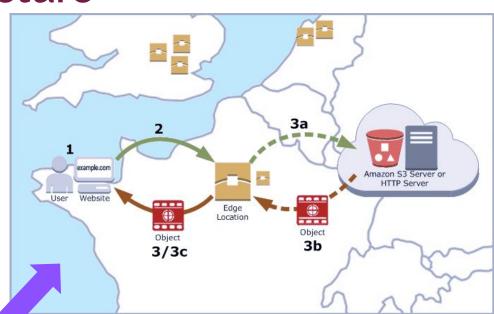

Environmental Layer

Edge Locations

- edge location An where end-users access services located at AWS and used for caching content.
- 400 + Edge Locations

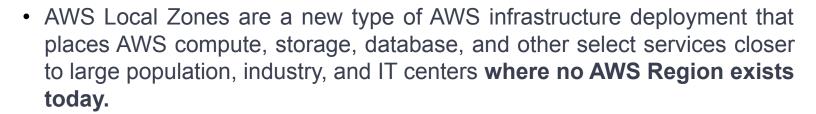

: 1-2-3a-3b-3c-1 **First Query**

Second Query: 1-2-3-1

AWS Infrastructure

AWS Local Zones

- Each AWS Local Zone location is an extension of an AWS Region
- There are 35 Local Zones currently

AWS Free Tier

AWS Free Tier? What is AWS Free Tier?

- The AWS free tier is a account type that lets you gain free, hands-on experience with AWS products and services.
- The AWS free tier provides customers the ability to explore and try out aws services free of charge up to specified limits for each service.

AWS Free Tier

Free Tier Offer Types

The Free Tier is comprised of three different types of offerings;

- Services with a 12-month free tier allow customers to use the product for free up to specified limits for one year from the date the account was created.
- Services with an always free offer allow customers to use the product for free up to specified limits as long as they are an aws customer.
- Services with a short term trial are free to use for a specified period of time or up to a one-time limit depending on the service selected.

AWS Free Tier

Billing Policy

- You are recommended to set a billing alarm to stay within the limits.
- If your application use exceeds the free tier limits, you simply pay standard, pay-as-you-go service rates.
- AWS Free Tier is applied to your **monthly usage**. It will expire on the 1st day of each month and does not accumulate.

Creating AWS Free Tier

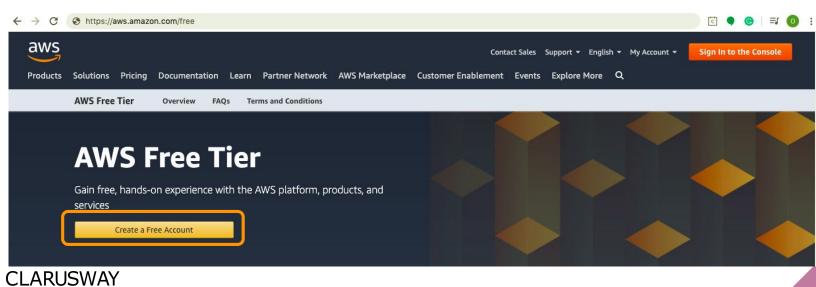

WAY TO REINVENT YOURSELF

Creating AWS Free Tier

Then click, "Create Free Account"

Creating AWS Free Tier

 On clicking on the "Create Free Account" button, the following screen appears that requires some fields to be filled by the user including email address, password and account name.

Creating AWS Free Tier

 Select "Personal" as an account Type and then fill your contact information.

| Contact Information | All fields are required. |
|--|--------------------------|
| Account type Professional Full name awsdevopsteam | |
| Phone number 1234567889 | |
| Country/Region United States | |
| Address xxxxxxxxxxx | |
| City | |
| State / Province or region | |
| Postal code xxxxxxxxxxx | |
| Check here to indicate that you have read and agree to the terms of the AWS Customer Agreement | |
| Create Account and Continue | |

Creating AWS Free Tier

Fill your payment information.

Payment Information

We use your payment information to verify your identity and only for usage in excess of the AWS Free Tier Limits. We will not charge you for usage below the AWS Free Tier Limits. For more information, see the frequently asked questions.

(i)

When you submit your payment information, we will charge \$1 USD/EUR to your credit card as a verification charge to ensure your card is valid. The amount may show as pending in your credit card statement for 3-5 days until the verification is completed, at which time the charge will be removed. You may be redirected to your bank website to authorize the verification charge.

| XXXXXXXXXX | |
|------------------------|--|
| piration date | |
| x + xxxx + | |
| ardholder's name | |
| XXXXXX. XXXXXX | |
| ling address | |
| Use my contact address | |
| | |
| | |
| Use a new address | |

Creating AWS Free Tier

- Confirm your identity by entering your phone number and code displayed in the captcha.
- Choose "Contact me ".
- If you chose to verify your account by SMS, choose "Send SMS" instead, like in the picture.
- Then enter the PIN you receive by text message or voice call, and then choose "Continue".

Creating AWS Free Tier

After verification, select the support Plan. Choose the "Basic Plan " which is free.
